

Information for using the tablet

The borrowed tablet package is provided to you within the loan period for keeping the electronic lab notebook eLabFTW offered at Clausthal University of Technology. The usage of the hardware in laboratories and factory halls is permitted under consideration of the following aspects:

- The contact of the tablet incl. accessories with harmful substances and contaminations must generally be avoided.
- The tablets incl. accessories must not be used when working in dusty environments. Particularly, dust from carbon fibers can cause irreversible damage to electronic devices.

Internet access at the campus of Clausthal University of Technology is possible via the eduroam Wi-Fi. The personal login must be used. At the end of the loan period, the tablet must be reset to the factory settings so that it can be made available again for subsequent loans by other interested parties. You can reset the tablet yourself before returning it. Personal data should be saved on another device in advance; the data in the electronic lab notebook eLabFTW is not affected. The tablet will be reset by the University Library Staff after it has been returned at the latest— regardless of any data that may still be on the tablet.

If you have any questions regarding the tablet package, the operation or the electronic lab notebook eLabFTW, please send an email to fdm@tu-clausthal.de. The RDM Team will respond to your request as quickly as possible.

Questions about the lending process can be addressed to the staff at the Service Desk in the University Library.
